

Financial Document Verification System - Master Business Rules

This document consolidates all business rules, checks, and formatting requirements for verifying onboarding documents submitted by sub-billers to the KPITB (Khyber Pakhtunkhwa Information Technology Board). No details have been omitted.

1. Required Documents

The system shall verify the presence of the required document set: 1. Tripartite Agreement 2. Bilateral Agreement 3. Account Maintenance Certificate 4. 1-Link Application Form (In-Direct Customer) 5. Authority Letter 6. Schedule of Charges Agreement 7. Business Requirement Document (BRD) 8. Formal Request Letter 9. Declaration of Sub-Biller / Supporting Documents where applicable (e.g., CNIC copies, E-Stamp Papers)

Note: The ninth checklist point is excluded from the current verification scope where specified, but CNIC copies and E-Stamps are checked when present.

2. Authority Letter

Content Requirements The system shall verify that the Authority Letter: - Is prepared on the organization's official department letterhead. - Contains the focal person's name. - Contains the focal person's designation. - Contains the required authority/organization information. - Contains all required information in the prescribed format. - **Account maintenance details must appear at the top** of the authority letter.

Signature & Stamp Requirements - The Authority Letter **must be duly signed** by the authorized head/authority. - The Authority Letter **must contain the required official stamp** where prescribed. - The system shall verify the presence and readability of the required stamp.

3. Account Maintenance Certificate

Content Requirements The system shall verify that the Account Maintenance Certificate: - Is issued on the bank's official letterhead (color is not a requirement, but it must be official). - Follows the required bank certificate format flawlessly. - Contains the required account-holder information. - Contains the bank account number. - Contains the IBAN where required. - Contains the required bank information. - Contains complete and readable information. - **Consistency Check:** The Account Title, Account Number, and Branch Name/Number must perfectly match the details provided in both the Tripartite and Bilateral agreements.

Signature & Stamp Requirements - The Certificate **must be duly signed** by the authorized bank representative. - The Certificate **must contain the required bank stamp**. - The system shall verify stamp presence, location, readability, and required information. Stamp color is not considered a validity requirement.

4. 1-Link Application Form (In-Direct Customer)

Content Requirements The system shall verify that: - Organization Name is filled in. - NTN is provided where applicable, or explicitly marked N/A if not applicable. - Country of incorporation is stated. - Proprietor / Directors / Partners details (including names and CNICs) are completely filled. This is mandatory. - The appropriate checklist category is selected for "Nature of Business", "Organization Type", and "Business Classification". If none apply, **Others** must be selected and specified. - License issue/details are mentioned where required. - Required application information is complete and no fields are incorrectly left blank. - **Account Match:** The Title of Account and Bank Account Number must exactly match what is written on the Account Maintenance Certificate.

Signature & Stamp Requirements - **Every single page must be signed and stamped.** - The form must contain the required applicant/authorized signatures according to the approved form. - The form must contain

the required official stamp.

5. Declaration of Sub-Biller

Content Requirements The system shall verify that the declaration: - Identifies the organization. - Clearly states the intended sub-biller relationship. - Contains the required organization information. - Clearly indicates where applicable that **KPITB intends to act as a sub-biller / aggregator**. - Contains the required declaration information.

Signature & Stamp Requirements - The "Declaration of Sub-Member" section must be signed and stamped. - The "Aggregator" section (belonging to KPITB) must also be properly signed and stamped. - The system shall verify the required signature presence, official stamp presence, and information associated with them.

6. Tripartite Agreement

Content Requirements The system shall verify that: - All three participating organizations are named: 1-Link (Biller), KPITB (Bill Aggregator), and the Sub-biller (the onboarding department). - Organization names are complete, consistent, and correctly written everywhere. **(Watch out for placeholder copy-paste errors like "Government Degree College" when it should be another department)**. - Required agreement sections are present. - Point numbering is correct and sequential (All bullet/number points are complete, detailing documents present). - Required text and account information are present. - The agreement follows the prescribed structure and is checked in detail rather than only checking its existence. - **Bank Details Verification:** Under the bank details section (e.g., bullet point 2, sub-point 5), the Account Title and Branch must exactly match the Account Maintenance Certificate.

Date Requirement - The agreement **should not contain an entered date** in the first 2 lines (preamble). Dates must remain blank where the approved template requires it. An incorrectly populated date shall be flagged.

Signature & Stamp Requirements - Must contain the required signatures of 1-Link, the Sub-biller, the Bill Aggregator, and the respective witnesses for each party. - Must contain the required official stamp(s). - The system shall verify stamp presence, location, readability, and required stamp information.

Witness Requirement - Required witnesses are present for all parties. - Witness information and signatures are provided.

7. Bilateral Agreement (SLA)

Content Requirements The system shall verify: - Required organization names (specific department must be clearly stated). - Complete organization names. - Required sections and correct point numbering. - Required text (The main body text A, B, C, D points must remain intact and unmodified from the standard template). - Required agreement structure and prescribed text formatting where formatting is a business requirement.

Platform Terminology (PayMin / Digital Muhasil / Paymere BCX) - The document must explicitly mention the correct digital platform, e.g., "Digital Muhasil" or "PayMin" / "Paymere BCX". - The complete wording must be present, and **parallel line-to-line formatting must be maintained** exactly as the standard template.

Section 5 - Transaction Charges - Transaction charges must be explicitly mentioned in Section 5.2 (e.g., "as per prevailing charges of 1-Link"). - Charges must be stated in PKR. - Required transaction-charge information is complete.

Section 6 - Account Information - The relevant bank account numbers must be listed. - The account number here must exactly match the Account Maintenance Certificate and Tripartite Agreement.

Date Requirement - The effective date and authorized person details should be checked, but dates that are required to remain blank **must remain blank**.

Signature & Stamp Requirements - Must be signed and stamped everywhere required. - Ensure Party A and

Party B signatures and witnesses are present and consistent. If Party B witnesses are missing, verification is required if another director signed as a witness.

8. E-Stamp Papers & Notary Public (Participation Memorandum & SLA)

Content Requirements - Visual Authentication: The print should visually resemble an original E-stamp paper (typically a brownish color texture), not just a plain A4 white paper printout. - **Text Validation:** Check the Non-judicial description, First Party, and Second Party details on the stamp paper to ensure they are accurate and match the intended agreement. - **Watermark:** Ensure the E-stamp watermark and extensions are valid. E-stamps shall be accepted as valid evidence and may be cross-checked against official online information.

Notary Public Requirements - Where notarization is required, the document must contain a **Notary Public stamp/seal**. - Required notarial information must be present. - The notary public stamp and the picture/signature of the notary guy must be clearly visible and verifiable.

9. Schedule of Charges Agreement

Content Requirements The system shall verify: - Required charge and transaction information. - Correct currency where applicable. - Required document structure. - Complete and readable information.

Signature & Stamp Requirements - Must contain the required signature(s) and official stamp. - The system shall verify stamp presence and readability.

10. Business Requirement Document (BRD)

Content Requirements The system shall verify that the BRD: - Identifies and lists all the revenue-generating services the department provides (e.g., filming fees, photography fees, ticket entries) that the organization wants to digitize. - Confirms that these payments are required to be digitized. - Does not omit required services. - Follows the required structure and properly documents requested services.

Signature & Stamp Requirements - Must contain the required signature where prescribed. - Must contain an official stamp where required by its approved format.

11. Formal Request Letter

Content Requirements The system shall verify that: - The formal request is present and explicitly requests that KPITB onboard them as a sub-biller. - **Subject Line:** The subject must clearly state the intent, for example: "Onboarding as a sub-biller with KPITB". - Required organization information, request details, and readable information are present.

Signature & Stamp Requirements - Must contain the required authorized signature and official stamp where prescribed.

12. CNIC Copies Verification

The system shall verify: - CNIC copies for all authorized persons (Proprietor, Directors, Partners) are present and attached. - CNIC follows the required format and is not expired. - CNIC is clearly readable. - CNIC information is consistent with the relevant applicant/proprietor information.

13. Cross-Document Consistency (Critical Checks)

Account Consistency The exact same bank account information (Account Title, Account Number, Branch Number/Name, IBAN) must be perfectly consistent across: 1. Account Maintenance Certificate 2. Bilateral

Agreement 3. Tripartite Agreement *Note: A mismatch shall generate a business-rule failure or human-review flag.*

Organization Consistency The system shall compare organization names across all relevant documents to identify: - Missing organization names - Different organization names - Inconsistent spelling or unexpected abbreviations - Incomplete names

14. Document Formatting and Structure

Where an approved template exists, the system shall verify: - Required sections, points, correct point numbering, wording, and fields. - Required text formatting where explicitly part of the requirement. - Correct placement of information. - Dates populated only where required, and dates left blank where the template requires them to remain blank. - Validation is based on the approved document templates, not generic assumptions.

15. Human Verification & Verification Principle

Automated verification does not constitute the final decision. The system checks signature presence and required location, not signature authenticity. The authorized employee remains the final decision-maker.

The employee shall review (Manual Review Required): - Low-confidence OCR fields. - Uncertain signatures or stamps. - Account/IBAN mismatches. - Organization-name discrepancies. - Formatting discrepancies or Agreement inconsistencies. - CNIC discrepancies. - Possible tampering or originality concerns.

Rule Result Classification: - **PASS:** The requirement is satisfied with sufficient confidence. - **WARNING:** A potential issue exists but does not automatically block processing. - **MANUAL REVIEW REQUIRED:** The system cannot reliably determine whether the requirement is satisfied. - **FAIL:** A required business rule is clearly violated. - **REJECTED:** The authorized employee has made the final rejection decision.

Verification Principle: The system shall not consider OCR text alone sufficient evidence that a financial document is valid. Verification must combine OCR, Regex/Field Extraction, Cross-Document Comparison, Signature & Stamp Detection, and Business Rules.
