

# Financial Document Verification System — Business Rules

## 1. Required Documents

The system shall verify the presence of the required document set:

1. Tripartite Agreement
2. Bilateral Agreement
3. Account Maintenance Certificate
4. 1-Link Application Form
5. Authority Letter
6. Schedule of Charges Agreement
7. Business Requirement Document
8. Formal Request Letter
9. Declaration of Sub-Biller / Supporting Documents where applicable

The ninth checklist point is excluded from the current verification scope where specified.

---

## 2. Authority Letter

### Content Requirements

The system shall verify that the Authority Letter:

- Is prepared on the organization's official department letterhead.
- Contains the focal person's name.
- Contains the focal person's designation.
- Contains the required authority/organization information.
- Contains all required information in the prescribed format.

### Signature Requirement

The Authority Letter **must be duly signed by the authorized head/authority**.

The system shall verify the presence of the required signature.

### Stamp Requirement

The Authority Letter **must contain the required official stamp** where prescribed by the approved document format.

The system shall verify the presence and readability of the required stamp.

---

## 3. Account Maintenance Certificate

### Content Requirements

The system shall verify that the Account Maintenance Certificate:

- Is issued on the bank's official letterhead.
- Follows the required bank certificate format.
- Contains the required account-holder information.
- Contains the bank account number.
- Contains the IBAN where required.
- Contains the required bank information.
- Contains complete and readable information.

The bank letterhead does not have to be a specific color. The important requirements are the **official bank letterhead and prescribed format**.

### Signature Requirement

The Account Maintenance Certificate **must be duly signed by the authorized bank representative**.

### Stamp Requirement

The Account Maintenance Certificate **must contain the required bank stamp**.

The system shall verify:

- Stamp presence
- Stamp location where applicable
- Stamp readability
- Required stamp information

Stamp color is **not** considered a validity requirement.

---

## 4. 1-Link Application Form

### Content Requirements

The system shall verify that:

- All required information is filled.

- NTN is provided where applicable.
- If NTN is not applicable, the field is explicitly marked **N/A**.
- The appropriate checklist category is selected.
- If the required category is not available, **Others** is selected and the relevant category is specified.
- License issue/details are mentioned where required.
- Proprietor information is complete.
- Required proprietor/owner details are provided.
- Required application information is complete.
- Required fields are not incorrectly left blank.

### Signature Requirement

The 1-Link Application Form **must contain the required applicant/authorized signatures** according to the approved form.

The system shall verify the presence of the required signature(s).

### Stamp Requirement

The 1-Link Application Form **must contain the required official stamp**.

The system shall verify the presence and readability of the stamp.

---

## 5. Declaration of Sub-Biller

### Content Requirements

The system shall verify that the declaration:

- Identifies the organization.
- Clearly states the intended sub-biller relationship.
- Contains the required organization information.
- Clearly indicates where applicable that **KPITB intends to act as a sub-biller**.
- Contains the required declaration information.

### Signature and Stamp

Where required by the approved declaration format, the system shall verify:

- Required signature presence.
  - Required official stamp presence.
  - Required information associated with the signature/stamp.
-

## 6. Tripartite Agreement

### Content Requirements

The system shall verify that:

- All participating organizations are named.
- Organization names are complete and consistent.
- Required agreement sections are present.
- Point numbering is correct and sequential.
- Required text is present.
- Required account information is present.
- The agreement follows the prescribed structure.
- The document is checked in detail rather than only checking its existence.

### Date Requirement

The agreement **should not contain an entered date** where the approved template requires the date to remain blank.

An incorrectly populated date shall be flagged.

### Signature Requirement

The Tripartite Agreement **must contain the required signatures**.

The system shall verify:

- Required party signatures are present.
- Required witness signatures are present.
- Signatures are sufficiently visible.

### Stamp Requirement

The Tripartite Agreement **must contain the required official stamp(s)**.

The system shall verify:

- Stamp presence
- Expected location where defined
- Readability
- Required stamp information

## Witness Requirement

The system shall verify:

- Required witness is present.
  - Witness information is provided where required.
  - Witness signature is present.
- 

# 7. Bilateral Agreement

## Agreement Content

The system shall verify:

- Required organization names.
- Complete organization names.
- Required sections.
- Correct point numbering.
- Required text.
- Required agreement structure.
- Prescribed text formatting where formatting is a business requirement.

## Date Requirement

Dates that are required to remain blank in the approved Bilateral Agreement format **must remain blank**.

## Paymere BCX

The system shall verify that the required **Paymere BCX** terminology is present in full.

Where specified by the approved document format:

- The complete Paymere BCX wording must be present.
- Required Paymere BCX formatting must be preserved.
- Required parallel/line-to-line formatting must be maintained.

## Section 5 — Transaction Charges

The system shall verify that:

- Transaction charges are explicitly mentioned.
- Charges are stated in **PKR**.
- Required transaction-charge information is complete.

## Section 6 — Account Information

The account number must match across:

- Tripartite Agreement
- Bilateral Agreement
- Account Maintenance Certificate

The system shall verify both:

- Account number
- IBAN where applicable

If one document contains two account numbers while another corresponding document contains only one, the discrepancy shall be flagged for human review or rejection according to the applicable rule.

### Witnesses

The system shall verify:

- Required witnesses are present.
- Required witness information is provided.
- Witness signatures are present.

### Signature Requirement

The Bilateral Agreement **must contain the required signatures**, including required witness signatures.

### Stamp Requirement

The Bilateral Agreement shall be checked for the required stamp(s) **where prescribed by the approved agreement format**.

---

## 8. Schedule of Charges Agreement

### Content Requirements

The system shall verify:

- Required charge information.
- Required transaction information.
- Correct currency where applicable.
- Required document structure.
- Complete and readable information.

### Signature Requirement

The Schedule of Charges Agreement **must contain the required signature(s)**.

### Stamp Requirement

The Schedule of Charges Agreement **must contain the required official stamp**.

The system shall verify stamp presence and readability.

---

## 9. Business Requirement Document

The system shall verify that the Business Requirement Document:

- Identifies the services that the organization wants to digitize.
- Includes all services intended to be digitized.
- Does not omit required services.
- Contains the required organization information.
- Follows the required structure.

The primary business check is whether **all requested services for digitization are properly documented**.

### Signature Requirement

The Business Requirement Document **must contain the required signature** where prescribed.

### Stamp Requirement

The document shall be checked for an official stamp **where required by its approved format**.

---

## 10. Formal Request Letter

### Content Requirements

The system shall verify that:

- The formal request is present.
- Required organization information is present.
- Required request details are present.
- Required information is complete and readable.

## Signature Requirement

The Formal Request Letter **must contain the required authorized signature**.

## Stamp Requirement

The Formal Request Letter shall contain the required official stamp **where prescribed by the approved format**.

---

# 11. Signature Requirements Summary

The system shall explicitly require signature presence in:

| Document                        | Signature Required       |
|---------------------------------|--------------------------|
| Authority Letter                | Yes                      |
| Account Maintenance Certificate | Yes                      |
| 1-Link Application Form         | Yes                      |
| Tripartite Agreement            | Yes                      |
| Bilateral Agreement             | Yes                      |
| Schedule of Charges Agreement   | Yes                      |
| Business Requirement Document   | Yes                      |
| Formal Request Letter           | Yes                      |
| Declaration of Sub-Biller       | Where required by format |

For agreements requiring witnesses, the system shall additionally verify the required **witness signatures**.

## Important

The system checks **signature presence and required location**, not signature authenticity.

It does not determine whether the signature actually belongs to the person whose name appears on the document.

---

# 12. Stamp Requirements Summary

The system shall explicitly require stamp presence in:

| Document                        | Stamp Required             |
|---------------------------------|----------------------------|
| Authority Letter                | Yes, where prescribed      |
| Account Maintenance Certificate | Yes                        |
| 1-Link Application Form         | Yes                        |
| Tripartite Agreement            | Yes                        |
| Bilateral Agreement             | Where prescribed by format |
| Schedule of Charges Agreement   | Yes                        |
| Business Requirement Document   | Where prescribed           |
| Formal Request Letter           | Where prescribed           |
| Declaration of Sub-Biller       | Where required by format   |

## Stamp Verification

The system shall check:

- Presence
- Readability
- Required location where defined
- Relevant stamp information
- Required stamp/seal format

## Stamp Color

Stamp color is **not a validity requirement**.

A stamp should not fail simply because it is black, blue, red, or another acceptable color.

## E-Stamps

Where e-stamps are applicable:

- E-stamps shall be accepted as valid evidence.
- Relevant e-stamp information may be cross-checked against official online information where such verification is part of the approved workflow.

## Notary Public

Where notarization is required, the system shall verify:

- Notary Public stamp/seal
- Required notarial information
- Required signature/stamp details

- Required associated identification/image information where prescribed by the format
- 

## 13. Cross-Document Account Consistency

The same bank account information must be consistent across:

1. Account Maintenance Certificate
2. Bilateral Agreement
3. Tripartite Agreement

The system shall compare:

- IBAN
- Account number
- Bank information

A mismatch shall generate a business-rule failure or human-review flag depending on the nature and confidence of the discrepancy.

---

## 14. Cross-Document Organization Consistency

The system shall compare organization names across relevant documents.

The system shall identify:

- Missing organization names
- Different organization names
- Inconsistent spelling
- Unexpected abbreviations
- Incomplete names

Potential discrepancies shall be flagged for human verification when they cannot be confidently resolved through normalization.

---

## 15. CNIC Verification

The system shall verify:

- CNIC is present where required.
- CNIC follows the required format.
- CNIC is readable.

- CNIC is not expired.
  - CNIC information is consistent with the relevant applicant/proprietor information.
- 

## 16. Document Formatting and Structure

Where an approved template exists, the system shall verify:

- Required sections.
- Required points.
- Correct point numbering.
- Required wording.
- Required fields.
- Required organization names.
- Required text formatting where formatting is explicitly part of the requirement.
- Correct placement of information.
- Dates populated only where required.
- Dates left blank where the approved template requires them to remain blank.

Template validation shall be based on the organization's approved document templates rather than generic assumptions.

---

## 17. Human Verification

Automated verification does not constitute the final decision.

The employee shall review:

- Low-confidence OCR fields.
- Uncertain signatures.
- Uncertain stamps.
- Account/IBAN mismatches.
- Organization-name discrepancies.
- Formatting discrepancies.
- CNIC discrepancies.
- Agreement inconsistencies.
- Possible tampering.
- Originality concerns.
- Any rule marked `MANUAL_REVIEW_REQUIRED`.

The employee can:

### **Approve**

Confirm that the application satisfies the required verification criteria.

### **Correct**

Correct incorrectly extracted or interpreted information.

The correction shall be stored as feedback with its provenance.

### **Reject**

Reject the application and provide the rejection reason.

---

## **18. Rule Result Classification**

### **PASS**

The requirement is satisfied with sufficient confidence.

### **WARNING**

A potential issue exists but does not automatically block processing.

### **MANUAL REVIEW REQUIRED**

The system cannot reliably determine whether the requirement is satisfied.

### **FAIL**

A required business rule is clearly violated.

### **REJECTED**

The authorized employee has made the final rejection decision.

---

## **19. Verification Principle**

The system shall not consider OCR text alone sufficient evidence that a financial document is valid.

Verification should combine:

### **Document Templates**

+

**OCR**

+

**Regex / Field Extraction**

+

**Cross-Document Comparison**

+

**Signature & Stamp Detection**

+

**Business Rules**

+

**Confidence Scoring**

+

**Human Verification**

The system provides automated assistance and evidence, while the **authorized employee remains the final decision-maker.**
